Rigging Damage Control & Spares Checklist

Standing Rigging / Running Rigging / Hardware Spares-

- **Short temporary shroud** (for wire rigging)
- Top fittings to match your mast tangs, short length of wire, swage stud to spare turnbuckle to engage chain plate, extra RH threaded toggle for jaw to jaw toggle spare
- Connect to damaged shroud with minimum 3x bulldog/wire rope clamps (6x if sistering). One or two temp short shrouds may be necessary due to wire and fitting size differences
- **Emergency Shroud Cutting Plan** Depending on your setup: rod VS wire and size. Options Include: wire cutters, fine tooth hacksaw and spare blades, battery powered grinder or hydraulic cutter
- Large spectra /dyneema single braid Diameter and length suitable for temporary shroud
- Small spectra / dyneema single braid spool Lashing
- **Assorted clevis and cotter pins** Usually a longer can be used, or at worst can be cut shorter
- Extra shackles Running rigging and hardware components
- Seizing Wire
- Snatch Blocks
- Sail Repair Materials (Dr. Sails adhesive & spare sail material)
- Fiberglass or Carbon Repair Kit Depending on your hull and spar materials (Dr. sails, West epoxy etc.)
- **Tape -** 3m electrical white
- Winch Parts Spare pawl springs, pawls, and winch cleaning kit
- Misc. extra fasteners, nuts and washers deck/mast hardware, blocks, etc.
- **Comprehensive Tool Kit** Including baby sledge and punch to drive out clevis pins)
- Splicing/Sail Repair Kit At least the basics: needles, whipping twine, sailmakers palm a few fids
- Mechanical Swage Fittings Hayn Hi-Mod, Sta-loc, etc. (Nice, but not necessary)

Chafe Protection-

- **Teflon tape** (PTFE) 3M or Protect Tape (many uses)
- Spectra chafe sleeve
- SS Tape

Misc. Compounds-

- Anti- corrosive compounds (non-retaining) Such as Marelube Tef 45, Tef Gel, or Lanocote: For isolating the dissimilar metals that will be disassembled, where vibration or shaking loose is not a concern. Example: turnbuckle threads, pins, most fasteners
- Anti- corrosive compound with retaining properties Such as Duralac, Loctite, or even silicone: To isolate and prevent the fastener from vibrating loose. Example: Sheave pins, spreader tip securing straps, standing rigging pins, etc.

Lubricants-

- Dry Silicone or McLube
- Winch Oil
- Winch grease

<u>Hydraulics-</u> (recommended life cycle 3-5 years)

- Spare caps and plugs to fit hyd. fittings on boat.
- Hyd. Fluid
- Rags
- Spare hose

Personal Gear-

- Reliable Knife
- **Multi tool** (Gerber or Leatherman)
- Safety Goggles & Gloves
